ADDENDUM TO THE SUPPLEMENT IN RESPECT OF THE FUND

This addendum to the supplement (the “Addendum”) forms part of and should be read in conjunction with the supplement for the Fund dated 21 November 2024 (the “Supplement”). The information contained in this Addendum should be read in the context of, and together with, the information contained in the Supplement and the ICAV’s prospectus dated 27 February 2023 (the “Prospectus”) and any previous addenda thereto.

The ICAV is an Irish collective asset-management vehicle registered in Ireland with segregated liability and variable capital which has been authorised by the Central Bank as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, as amended.

Words and expressions defined in the Supplement or the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Addendum.

The Directors of the ICAV, accept responsibility for the information contained in this Addendum. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Addendum is in accordance with the facts and does not omit anything likely to affect the import of such information. The Directors accept responsibility accordingly.

With effect from the date of this Addendum, the following amendments shall be made to the Supplement:

Addition to the section titled “Investment Policy”

1. The following text shall be inserted after the final paragraph of the section titled “Investment Policy”, which begins on page 3 of the Supplement:

“The Fund’s Reference Benchmark is the MSCI World Index (MXWO). As at the date of this Prospectus, MSCI Limited is included in the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority pursuant to Article 36 of the Benchmarks Regulation.

The Reference Benchmark draws its constituents from the energy, materials, industrials, consumer discretionary, consumer staples, healthcare, financials, information technology, telecommunications, and utilities sectors and represents large and mid-cap equity performance across twenty-three developed market countries. MSCI Limited calculates and

reports the Reference Benchmark in different variations. For example, the Reference Benchmark may be reported as either a net return index or a gross return index, or in different currencies. The Investment Manager shall determine which variation of the Reference Benchmark is most appropriate for the purposes of showing performance against the Target Return, and this shall be notified to investors in the relevant Share Class.

For the avoidance of doubt, the different variations of the Reference Benchmark do not change its underlying constituents. Instead, they are used for disclosure and reporting purposes only, allowing investors to more accurately assess the performance of the relevant Share Class by accounting for exchange rate fluctuations or understanding the impact of withholding taxes on dividends, leading to a more accurate assessment of the actual returns Shareholders may receive."
